

HR Employee Attrition & Talent Analytics Dashboard

Executive dashboard generated from the uploaded HR Employee Attrition dataset. The report combines descriptive HR analytics, attrition drivers, and employee-level risk scoring.

Total Employees
1,470

Employees Left
237

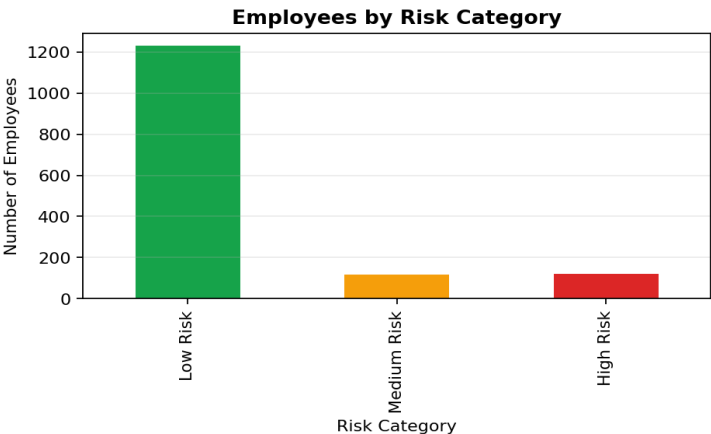

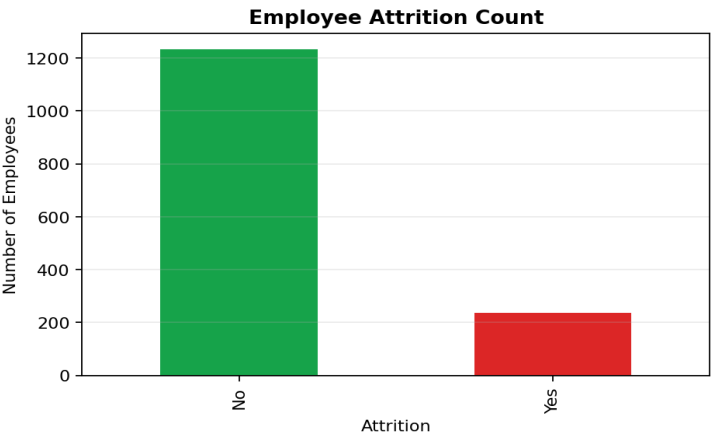

Active Employees
1,233

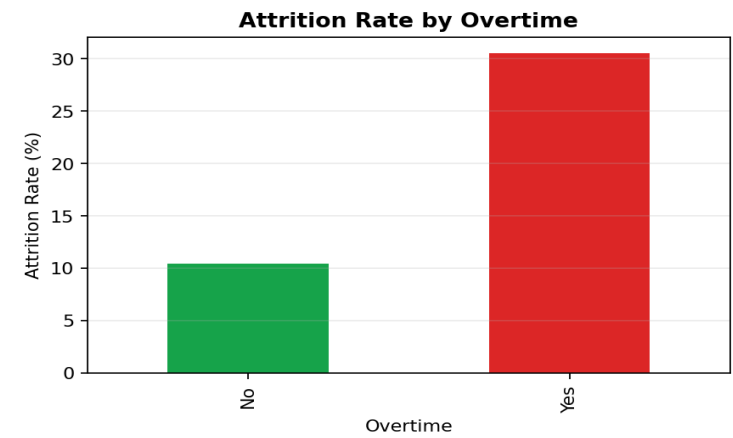

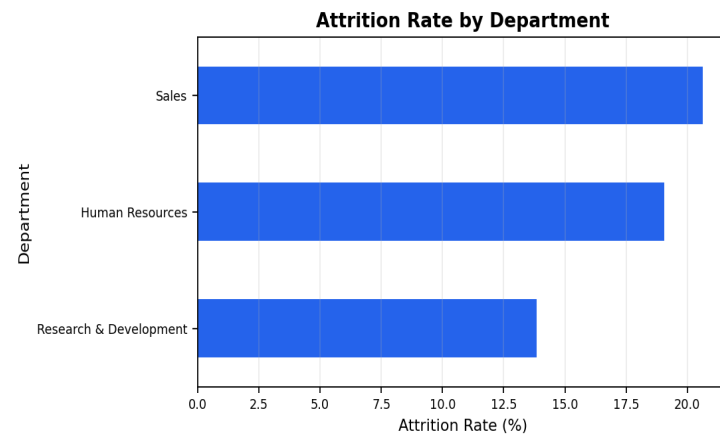

Attrition Rate
16.12%

High Risk Employees
122

Average Risk Score
20.13%

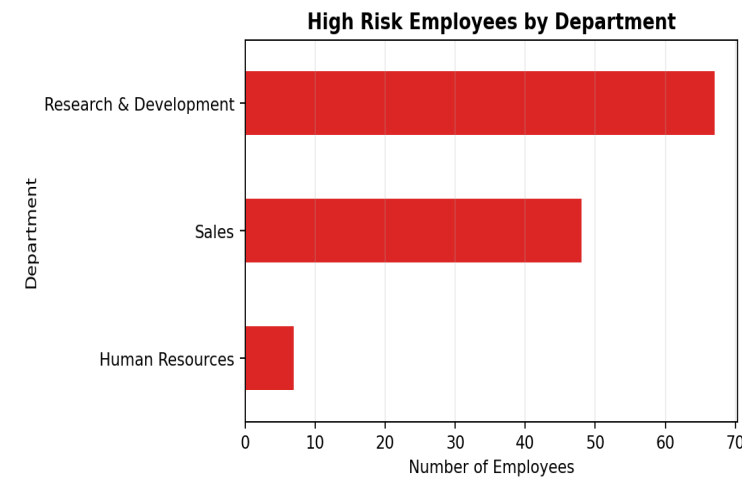

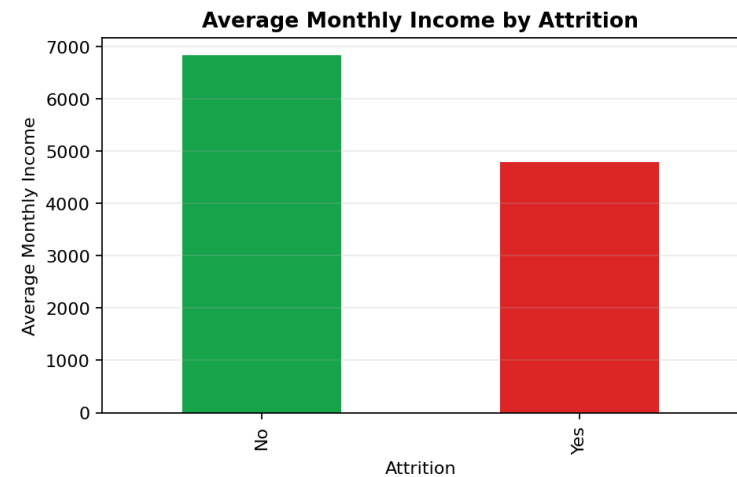

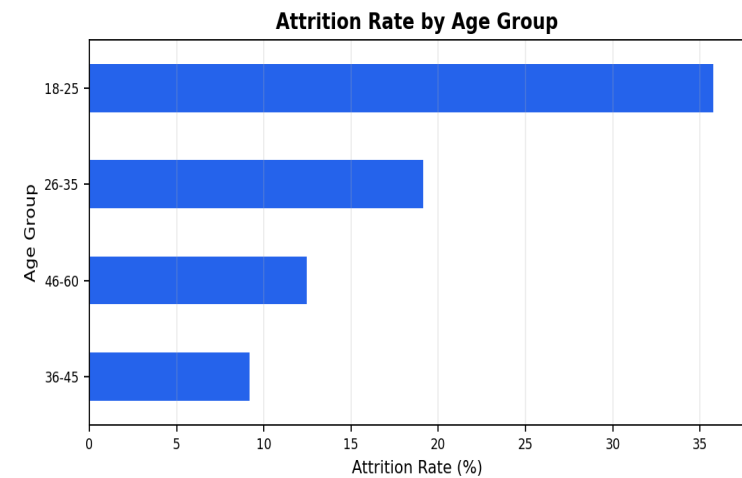

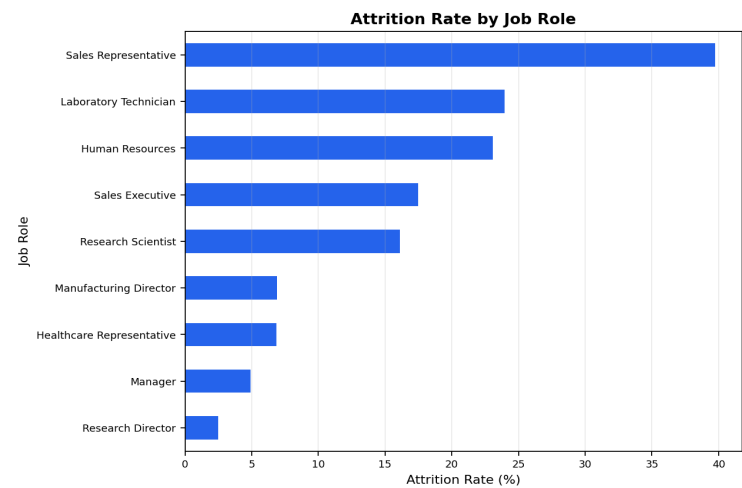

Executive Overview

Attrition Driver Analysis

These visuals show where attrition is concentrated across job roles, age groups, monthly income, and high-risk departments.

Senior insight: Attrition is not evenly distributed. It is concentrated among overtime employees, sales-related roles, younger employees, and lower-income groups. HR should focus on targeted retention interventions instead of a single company-wide policy.

Employee Risk Scoring

Low Risk Employees 1,229	Medium Risk Employees 119	High Risk Employees 122	Average Risk Score 20.13%
------------------------------------	-------------------------------------	-----------------------------------	-------------------------------------

Top 20 Highest-Risk Employees

ID	Age	Gender	Dept	JobRole	Income	OT	Actual	Risk %	Risk Cat.	HR Action
959	19	Male	Sales	Sales Representative	2121	Yes	Yes	94.34	High Risk	Immediate HR intervention required

Department and Job Role Summary

Department	Total	Left	Attrition %
Sales	446	92	20.63
Human Resources	63	12	19.05
Research & Development	961	133	13.84

JobRole	Total	Left	Attrition %
Sales Representative	83	33	39.76
Laboratory Technician	259	62	23.94
Human Resources	52	12	23.08
Sales Executive	326	57	17.48
Research Scientist	292	47	16.1
Manufacturing Director	145	10	6.9
Healthcare Representative	131	9	6.87
Manager	102	5	4.9
Research Director	80	2	2.5

Business Recommendations

1. Reduce overtime pressure in high-risk departments and teams.
2. Create retention plans for Sales Representative and Laboratory Technician roles.
3. Improve onboarding, mentoring, and manager check-ins for employees in their first 2 years.
4. Review compensation and growth paths for lower-income employee groups.
5. Conduct stay interviews for high-risk employees before resignation signals become irreversible.
6. Use monthly risk scoring in HR review meetings to support proactive workforce planning.

Final statement: This HR analytics dashboard moves the organization from descriptive reporting to predictive decision-making. HR can now understand who is likely to leave, why they may leave, and what action should be taken to reduce attrition risk.
